Objects and materials that hold sentimental value tap into a specific human emotion that deepens our connection to a space. Dynasty's tapestry warp lays the foundation for intricately colored ornate medallions while chenille yarns adorn the surface for a well loved vintage aesthetic. An extensive palette of fourteen colorways were inspired by treasured family keepsakes with a rich history and generations of stories to tell. With the permanent soil and stain fighting protection of Nanotex Dynasty ushers in a new era of nostalgia meant to be cherished for years to come.
